Professional Information

Flutter Developer with 2+ years of experience building high-performance cross-platform mobile applications. Specialized in scalable architecture, state management (BLoC, GetX), and performance optimization. Experienced in integrating REST APIs, Firebase services, real-time databases, and third-party SDKs to build production-ready mobile applications. Passionate about creating smooth UI/UX, optimized rendering performance, and maintainable codebases. Proven ability to collaborate with designers and backend teams to deliver scalable and user-friendly mobile applications.

Work Experience

Jr. Flutter Developer (Internship)

Jan-2023 to Mar- 2023

SuccessSoft Infotech

- Used Flutter widgets like Container, Row, Column, Text, ListView, Image to build basic UI screens.
- Added local data storage using SharedPreferences to support offline functionality.
- Built responsive UI/UX using Flutter widgets, animations for smooth cross-platform user experience.

Flutter Developer

Mar-2023 to Present...

Webforest Agency

- Developed and maintained production-level Flutter applications using scalable architecture and modular code structure.
- Implemented BLoC state management with a structured pattern, ensuring clear separation of UI and business logic.
- Developed custom Flutter plugins to integrate native Android and iOS features, reducing dependency on external packages.
- Managed plugin versioning and CI/CD integration to ensure stable builds and smooth release workflows.
- Integrated REST APIs and Firebase services including Authentication, Firestore, Realtime Database, and FCM for real-time features.
- Optimized widget rebuilds and rendering performance to maintain smooth UI across multiple devices.
- Implemented lazy loading and pagination to efficiently handle large datasets.
- Integrated third-party SDKs, video playback, audio features, and push notifications.
- Collaborated with UI/UX designers and backend developers to deliver responsive, pixel-perfect interfaces.
- Managed version control and collaboration using Git, GitHub, and Bitbucket.
- Developed reusable Flutter packages and modules to organize shared functionality and improve code maintainability across projects.
- Improved code quality by promoting reusable components and clean architecture practices.

Skill

Dart Programming

Flutter Widgets & Layouts

Custom UI Components

Animations (Rive, Lottie)

Responsive & Adaptive Design

Navigation (GetX, Navigator 2.0)

REST/GraphQL API Integration

WebSockets / Real-time data

Firebase Auth

Firebase Storage & Image Upload

Firebase Realtime Database

Push Notifications (FCM)

Figma

MVVM / MVC

Git / GitHub / Bitbucket

Postman/Swagger

SQLite

SharedPreferences

Lazy Loading / Pagination

Google Admob

Map Integration

In-App Purchase

Custom Flutter Plugins

Flutter Packages / Modular
Architecture

Education

Bachelor of Computer Application

Veer Narmad South Gujarat University, Surat, Gujarat.

(Jun. 2020 to Mar. 2023)

Project

Diamond Buying - Selling App

Developed a diamond marketplace app enabling users to buy, sell, and manage diamond listings with secure authentication.

Implemented advanced filter & search features (carat, color, clarity, shape, size, price) for fast and accurate diamond discovery.

Built a clean, responsive UI for displaying diamond details with HD images, certificates, and specification breakdowns.

Integrated backend APIs to handle real-time inventory updates, diamond availability, and pricing changes.

Implemented secure login, OTP verification, and role-based access to protect user data and transactions.

Added favourite/watchlist functionality allowing users to bookmark diamonds for future purchase.

Optimized the app for fast loading, smooth navigation, and lightweight performance, even with large data sets.

Fitness App

Developed a full fitness and wellness app with workout plans, guided exercises, and activity tracking through a smooth and easy-to-navigate UI.

Built a dedicated meal planning section with calorie tracking, diet suggestions, and personalized meal recommendations for users.

Designed face care and hair care modules offering routines, helpful tips, product suggestions, and progress tracking features.

Created a manifestation journal with goal-setting tools to help users stay positive and track their mindset improvements.

Integrated guided meditation sessions, breathing exercises, and relaxation audio to support mental wellness and mindfulness.

Implemented an in-app chat system to allow users to connect for support, guidance, or personal coaching.

Optimized the app with offline support, fast screen transitions, and a clean UI to deliver a smooth and reliable user experience.

Easy Pdf App

Images to PDF: Convert multiple photos or screenshots into a single, high-quality PDF instantly. Perfect for notes, bills, receipts, or scanned papers.

Scan PDF: Use your camera to capture physical documents and save them as PDFs that too fast, clear, and convenient (no OCR).

Merge PDF: Combine multiple PDF files into one organized document within seconds.

Split PDF: Extract or divide large PDFs into smaller, more manageable files.

Protect PDF: Add passwords and secure your confidential files from unauthorized access.

UnProtect PDF: Remove password restrictions and regain access to locked PDFs (with permission).

Remove Pages: Delete unwanted pages from a PDF easily, ideal for cleaning up or shortening documents.

Compress Image: Reduce image size before converting to PDF for faster sharing and smaller file sizes.
